Testing Debug report:

Functional Testing:

Functional testing is a kind of black-box testing that is performed to confirm that the functionality of an application or system is behaving as expected. It is done to verify all the functionality of an application. The below comes are the different functional testing:

- Unit testing
- Integration testing
- System testing
- User Acceptance testing

Unit Testing:

Test condition 1: Registration

Table 1: Registration Process as an Employer						
Case ID	Scenario	Steps	Test Data	Expected Result	Actual Result	Pass/Fail
TC1.2	Registration page should show "Register now" in the top left on the page	Go to: https://sinergy.lk , click "Register Now" in top right side of the page	Button click event	It should show "Registration page"	As expected	PASS

Test condition 4: Employer Dashboard

Table 4: Employer dashboard features						
Case ID	Scenario	Steps	Test Data	Expected Result	Actual Result	Pass/Fail
